Wellsite Consulting Services

Tectonic Energy Consulting Inc. has been providing wellsite **geological, completion, drilling** and construction supervision since 2003. Our safety conscientious supervisors have all the required certificates for their specific line of work. Our **project management** team can look after everything from contracts, procurement, logistics, surface land processing and post project review. All of our contractors carry WCB, and are insured. When looking for your specialized personnel, look no further than **Tectonic Energy Consulting Inc.**

Project Management Services

Tectonic Energy Consulting offers a wide variety of drilling and completions project management. We offer complete project management that includes cost estimates, detailed written programs, as well as obtaining quality cost effective services to perform the necessary operations. We also ensure all data submissions are completed during and after the project. We can look after the well from construction to final abandonment. This can be done for a single well or multi well projects across Western Canada.

Drilling Supervision Services

Tectonic Energy Consulting Inc. has been placing years of wellsite experience and industry knowledge on site to ensure a quality, cost effective and safe programs for both drilling & completion operations.
