K9 Services

Tectonic Energy Consulting Inc. K9 Services has extensive experience in utilizing K9. What sets us apart from others? We are extremely fit and can deploy to any remote and austere location... under any weather conditions and still maintain the excellent level of service required by our clients. We are highly adaptable... flexible and possess skills & training which enable us to react to any service requirement changes all the while maintaining an exemplary level of loyalty and discretion.

Our dogs are SINGLE PURPOSE ONLY... which means that each dog's training is solely focused on their area of expertise.

Our Dog handlers are graduates from the highly respected Obedience Plus Training facility in Maple Ridge, British Columbia & have been certified as per the Justice Institute of British Columbia standards. **Tectonic Energy Consulting Inc.** clients can rest assure that only CERTIFIED handles are employed. These handlers are also graduates of the LESTAC Law Enforcement and Security Training Academy of Canada. Our K9 services offer the following services:

- Explosives Detection
- Personal or Asset Protection
- Bed bug Detection
- Security patrols & Protection
- Search and Rescue
- Patrol Services

K9 Services

Narcotics Detection

Our Narcotic Detection K9 has been trained on actual real substances... is certified & validated as per Justice Institute of British Columbia and is maintained on a weekly basis to detect the following substances: Hashish, Marijuana, Heroin, Cocaine, Ecstasy and Methamphetamines

Patrol Services

One single **K9 Security Team** can seek and detect suspects at a significantly higher level of accuracy (virtually 100% in most cases and at a much faster speed than a Security guard without a **K9 partner**). **K9s** not only significantly enhance the client's level of protection...they also provide back-up and security for the **K9 handler**.

Personal or Asset Protection

We provide protection for home, business, corporate and personal needs. Whether your preference is protection by a **K9 Security Team** or **security guard** alone... our handlers possess extensive military experience, with deployments in multiple war-torn countries and domestic operations. Our handlers possess extensive surveillance and counter-terrorism training and experience, as well as personal protection, vehicle searches and counter IED experience.

Explosives Detection

Explosive Detector Dogs are extremely versatile canines possessing the flexibility to adapt to any type of search situation. Explosive detection handler training and certification as well as K9 bomb dog certification are part of the trained canine package.

Bed bugs Detection

Bed Bugs emit a strong odor which is undetectable to the human olfactory senses; however to the specialized nose of a **K9**, these Bed Bugs can't disguise themselves. **K9s** have **220 million olfactory receptors** compared to the measly 5 million of humans; therefore you can trust that a specially trained and certified **Bed Bug Detection K9** will sniff out these pesky critters. Bed Bug infestations can cost up to thousands of dollars in extermination fees and can cause a business to close its doors.

We look forward to meeting with you to discuss your projects requirements, for further information on pricing and availability please contact **Tectonic Energy Consulting Inc.** at (403) 238-2812 or visit our website at www.tectonicenergy.com.
