Network Security

Tectonic Energy Consulting Inc. Security Division provides **Network Security** services to both the general public as well as to corporations. Our agency is well versed in conducting network security testing and our senior agent holds the designation of Certified Ethical Hacker ... receiving advanced training in Network Penetration Testing.

From something as simple as a network security audit to a full penetration test and everything in between, we have technology, skills and agents to assist you with any issues whether malicious, or if you are simply looking for third party transparency for the security state of your network.

Some of the services in this area include:

1. Security audit to determine security status of network and patch deficiencies.
2. Analysis and repair of any findings from the above.
3. Forensic security analysis including addressing data leakage, data security, and focused data packet analysis.
4. Provisioning and implementation of Intrusion Detection Systems as they pertain to investigations, both overt and covert.
5. Penetration testing of the network, from simple wireless and external exploitation to full penetrations, involving social engineering and physical response.

For further information on pricing and availability please contact **Tectonic Energy Consulting Inc.** at (403) 238-2812 or visit our website at www.tectonicenergy.com.
