Road Monitoring

Tectonic Energy Consulting Inc. Security Services provides a road safety and speed control service. This creates a safe environment for workers as well as the public when traveling on roadways. Speeding is decreased if not eliminated & accidents and injuries are not as likely to take place. We take great pride in providing our clients with the highest quality of service available. We tailor our service to meet each client's specific needs & provide seamless support - encompassing ALL aspects of your security requirements.

Our security personnel can operate as ghost units or display security markings on the vehicle as per our client's instruction. The trucks are equipped with a 2 way radio which are programmed to the client's specific channels along with **LED warning lights, radar gun, cellphone & laptop**. Offenders are recorded and dealt with as per instruction of the client.

- Providing 2 way radios to monitor and ensure that 2 way radios are being utilized on radio controlled roads.
- Security service will help reduce potential accidents and confusion on the 2 way radios.
- Assistance with rig moves when they are taking place to ensure that traffic is aware of the interchange. We also communicate with the rig crews and truckers while the rig transport is taking place.
